Alonzo:

So what you are telling me is that you do not know what the volume that was transferred this weekend from Tank 26 to 30 and that is why the number did not change. Is that correct? Did they continue to do transfers and I should expect an additional 2511 bbls transferred for December 7,8,and 9?

Thanks

Gary Moore

Gary,

Tomorrow we plan to measure the fluid levels in Tank 26 to determine the volume of oil transferred from Tank 26 to Tank 30 this weekend.

The crew continues to transfer oil into Tank 30. Pumping is occasionally stopped to clean trash in the hose screen/pump from trash that is removed from Tank 26 throughout the work day.

Lazarus also did additional sandblasting of the floor in Tank 16.

Alonzo:

I am confused. The 12/7/12 report indicates that they transferred 3349 bbls of oil from Tank 26 to 30 (12/3-6/12) but on 12/8/12 and 12/9/12 reports do not show any additional progress so my question would be "What exactly was done this weekend in anticipation of taking off for the holiday later this month?" The report shows not detail of exactly what was done and it generally stays the same every day so I suppose that more specifics are needed on what is actually being done each day.

Thanks
